

Smart Study Planner Using Web Technologies

Mani Rithik (CS-2341323)

Under the Supervision of Mr. Harun Faridi

School of Computer Science and Engineering IILM University, Greater Noida

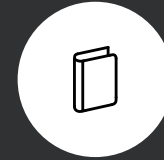

Session 2025-26

Introduction & Problem Statement

Time Management

Students struggle with balancing multiple subjects and assignments efficiently

Academic Workload

Increasing course complexity and volume demands better organizational tools

Traditional Methods

Paper planners and basic calendars lack adaptability and smart features

Adaptive Solution

Need for intelligent system that learns and adjusts to individual patterns

Project Objectives

01

Web-Based Platform

*Develop responsive study planner
accessible across devices*

02

Personalized Scheduling

*Customize study plans based on
individual preferences and learning styles*

03

Progress Tracking

*Monitor completion rates and identify
areas needing improvement*

04

Smart Reminders

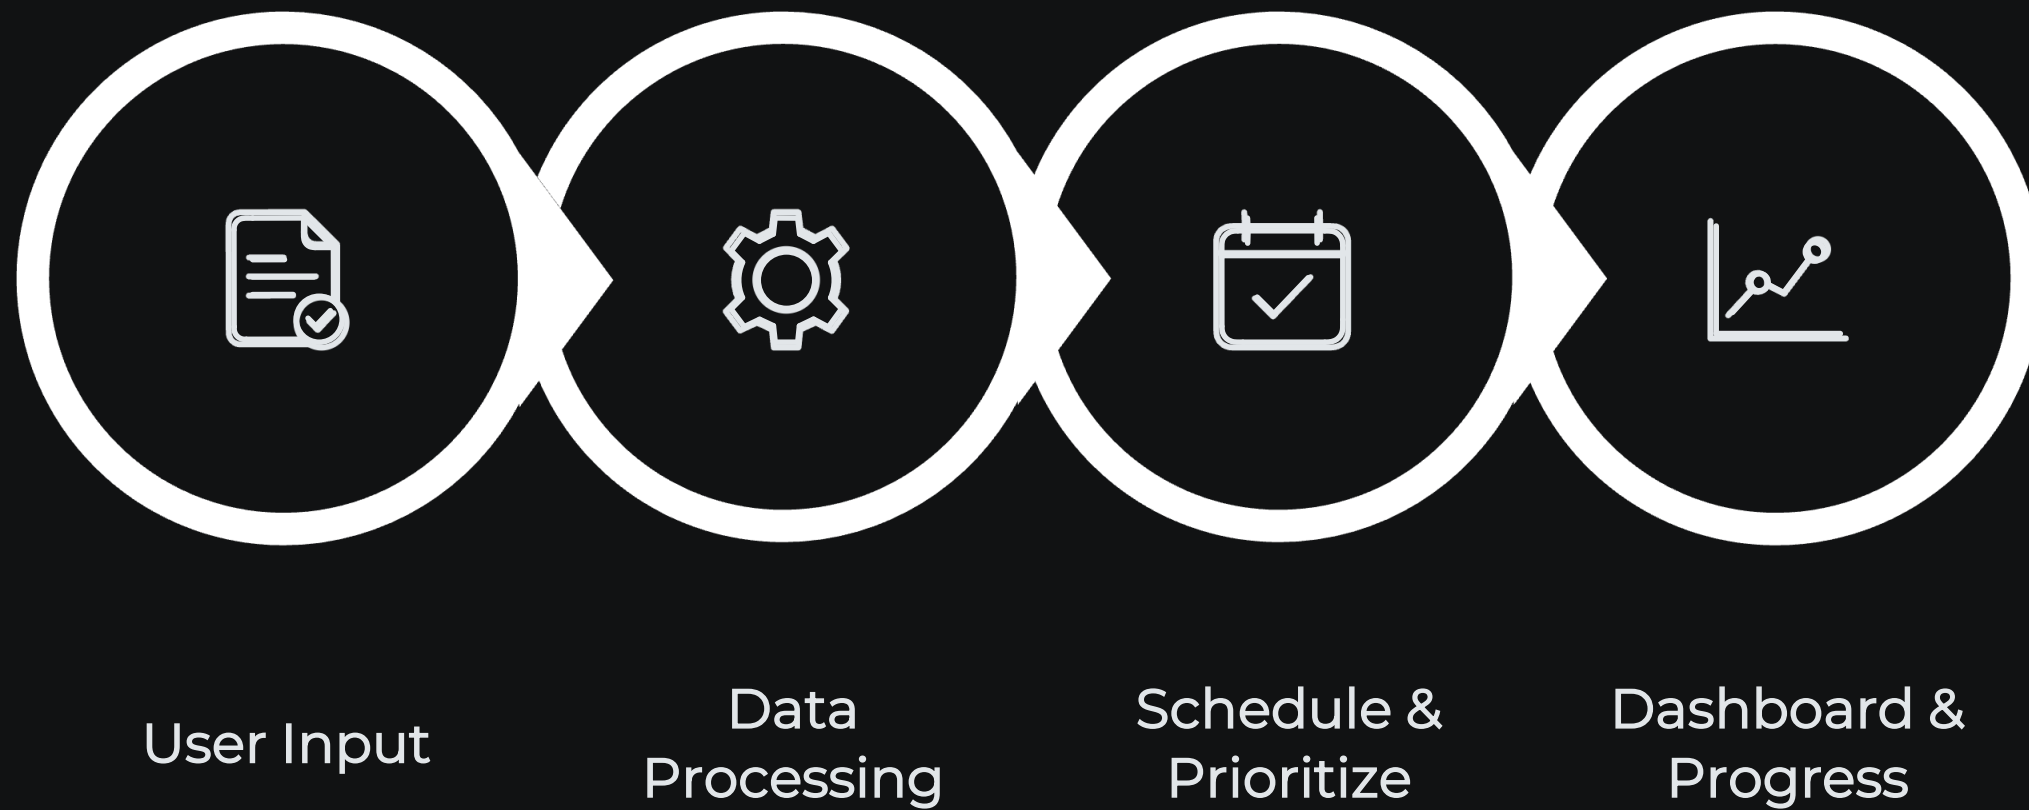

Automated notifications for deadlines and study sessions

05

Intuitive Interface

*User-friendly design ensuring seamless navigation and
engagement*

Methodology

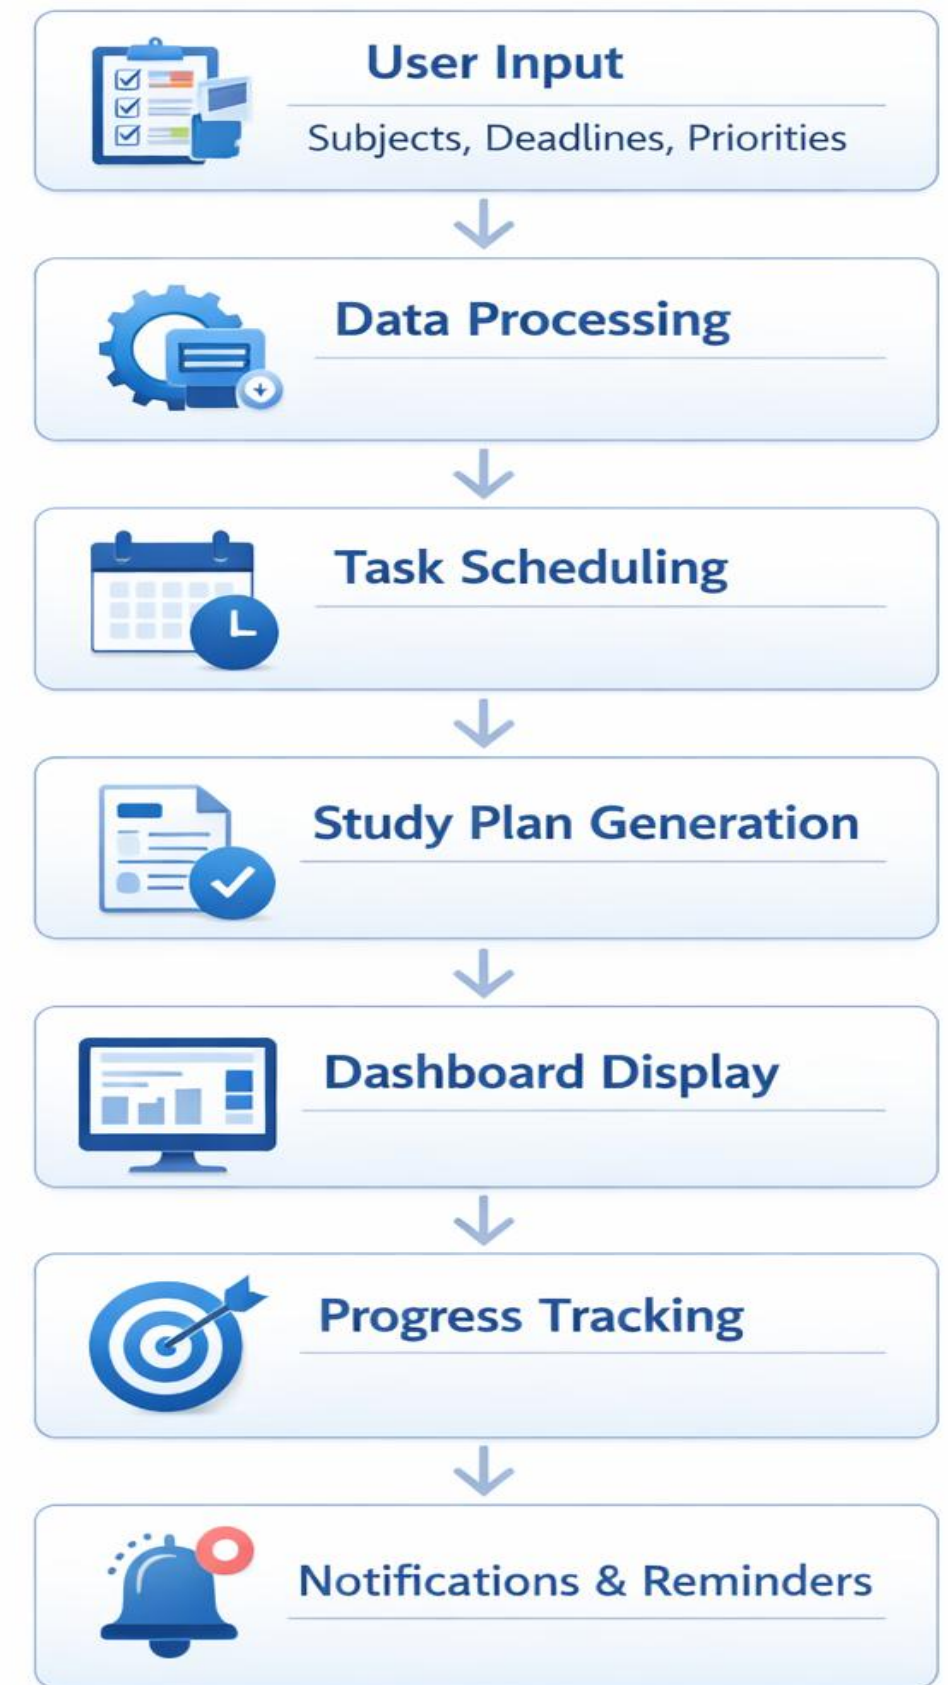

Tools & Technologies

Technology Stack

- *HTML, CSS, JavaScript for core functionality*
- *Bootstrap framework for responsive design*
- *React.js for dynamic user interface*
- *Node.js for server-side operations*
- *Firebase/MongoDB for data storage*

Applications

- *Daily study planning for students*
- *Institutional implementation in schools and colleges*
- *Integration with e-learning platforms*
- *Competitive exam preparation support*

Expected Outcomes & Conclusion

Enhanced Productivity

Improved time management through structured, adaptive study schedules

Task Completion

Better discipline and accountability with progress tracking features

Personalization

Tailored schedules and intelligent reminders matching individual needs

Scalable Solution

Future-ready architecture supporting growth and additional features

Web technologies transform education by creating accessible, intelligent tools that adapt to individual learning patterns, empowering students to achieve their academic goals efficiently.
